

Replace AirCal absorbents

Written By: Tanya Taylor

INTRODUCTION

The activated carbon and purafil capsules need to be replaced yearly.

A zero air scrubber replacement kit can be purchased from Aeroqual. It comes with all the relevant fittings so it can be installed easily into the AirCal 1000.

TOOLS:

- [Small Phillips head screwdriver](#) (1)

PARTS:

- [Zero air scrubber](#) (1)

Step 1 — Remove top plate

- Unscrew the 2 top screws at the back of the AirCal 1000. The top plate should slide out easily.

Step 2 — Remove old capsules

- Disconnect the tube between the purafil capsule and the pump.
- Unscrew the luer fitting connecting the purafil and activated carbon capsules.
- Unscrew the luer fitting connecting the activated carbon capsule and the heated carulite capsule (not visible).
- Unclip the purafil and activated carbon capsules and remove.

Step 3 — Insert new capsules

- Clip the new capsules into place.
- Reconnect the tube between the purafil capsule and pump.
- Screw the luer fittings to connect the capsules.
