

# Set control points

Written By: StJohn Vuetilovoni

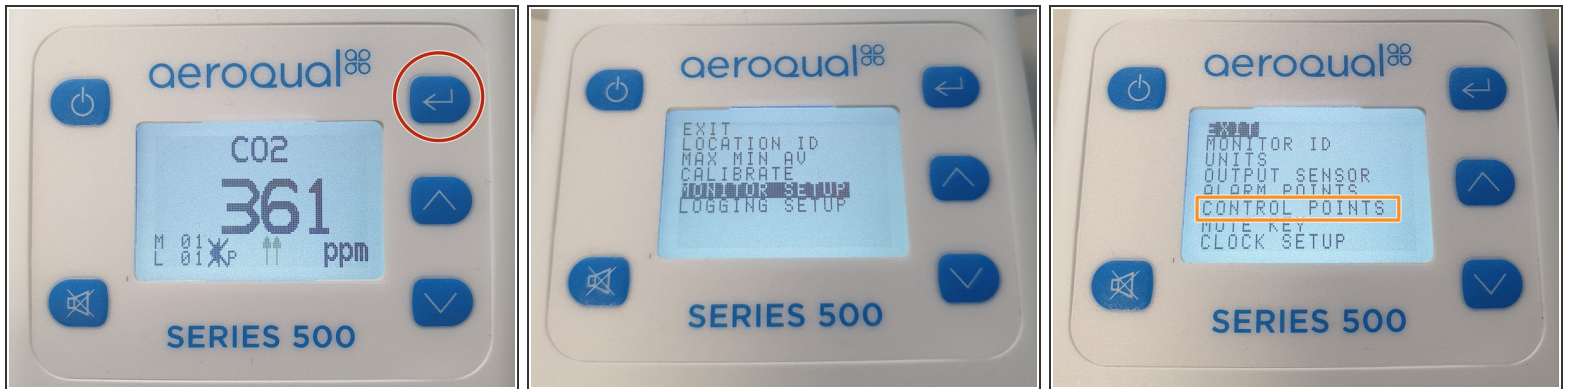

## INTRODUCTION

Use this guide to set control points for your connected devices.

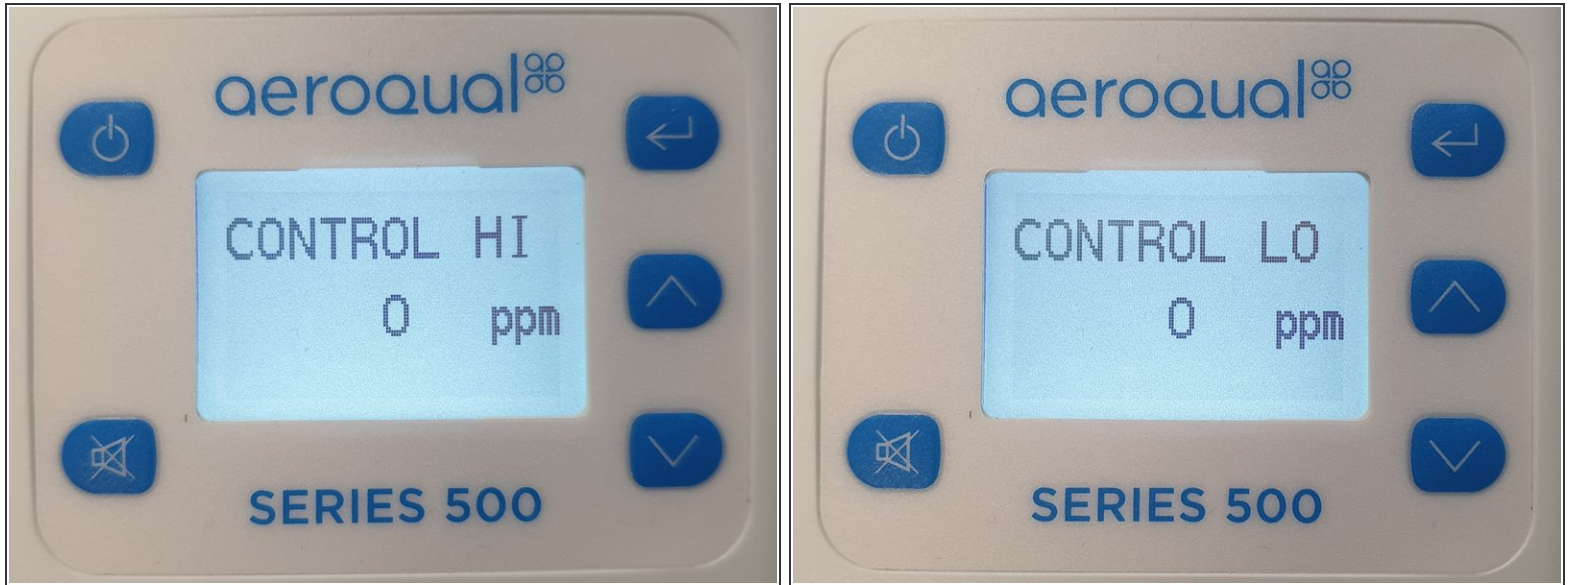

The control pin can then be [wired to control the generation of gas](#) that's between your specified high and low concentration limits.

## Step 1 — Enter control setup

- Press the **ENTER** button and select **MONITOR SETUP** from the main menu.
- Select **CONTROL POINTS** from the secondary menu.

## Step 2 — Change set points

**i** The factory default set points depend on the gas sensor head you chose when you bought your handheld monitor.

- Use the **UP/DOWN** buttons to select the required high (**HI**) concentration set point.
- Press **ENTER** to confirm the change.
- Use the **UP/DOWN** buttons to select the required low (**LO**) concentration set point.
- Press **ENTER** to confirm the selections and return to the main menu.
