

Track license expiry

Written By: Tanya Taylor

INTRODUCTION

If you're a distributor administrator, a licenses dashboard allows you to see, at a glance, which licenses are due to expire so you can effectively manage any renewals.

The dashboard is particularly useful if you manage a large number of customer licenses that have started at different times.

Step 1 — View dashboard

- From the Aeroqual Cloud home screen, select **Dashboards**.
- Click **Licenses** in the side menu.

Step 2 — Filter information

Organisation	Project	Serial number	Name	Version	License type	Period	Expiry

- The licenses dashboard shows you clearly which licenses have expired, which are about to expiry (within 2 months and within 4 months), and which ones are active for longer.
- If needed, you can filter the table by license type and organisation. You can also order information alphabetically by clicking a column header.
- To download license information, click **Export**. The file format is comma-separated values (.csv), which is easily opened in Microsoft Excel.

Step 3 — Set email alert

New organisation

Organisation name * Required

Location * Required

Main user * Required

Enter the email address here for enabling the email notification of license subscription. Use ";" separator to add multiple addresses

- Another way to track licenses that are due to expire is to set up an email alert for each organization.
- From the Aeroqual Cloud home screen, select **Administration**.
- When adding an organization, enter your email address in the **Main user** field. Use a semi-colon ';' separator to add multiple addresses.

- ❗ If several licenses are due to expire at the same time, you'll receive a single email for all of them.

Step 4 — Single monitor view

- If you're in instrument mode, you can see what licenses are assigned to a particular monitor by entering the **Configure** app and selecting **About** from the side menu.
